PROFESSIONAL PROFILE

Amr Hatem Mohamed Mohamed

Full-Stack Web Developer | Full-Stack Mobile Developer |
Data Analyst

About Me

I am a Full-Stack Web Developer, Full-Stack Mobile Developer, and Data Analyst focused on building practical digital solutions. I enjoy turning ideas into real products by connecting user interfaces, application logic, databases, mobile experiences, data analysis, and user-focused thinking. My goal is to create work that is clear, useful, reliable, and ready for real-world use.

My USP

I turn ideas and business needs into practical digital solutions by combining full-stack web and mobile development with data analysis, focusing on building clear, useful, and real-world ready products.

WHAT I DO

Building across the full digital stack

Development, data, and practical problem solving in one profile.

01

Full-Stack Web Development

Building complete web applications across user interface, application logic, APIs, and database layers using a practical end-to-end development approach.

02

Full-Stack Mobile Development

Building mobile application experiences across interface, app logic, data flow, offline behavior, notifications, and synchronization with a focus on practical cross-platform use.

03

Data Analysis & BI

Organizing, analyzing, and presenting data using Excel, Power BI, Access, SQL, and structured data techniques to support clearer insights and decisions.

04

Python Application Development

Developing structured Python applications using OOP, data handling, input validation, business logic, and GUI fundamentals for practical problem solving.

Full-Stack Web

React

TypeScript

HTML5

CSS3

JavaScript

Node.js

Next.js

NestJS

Supabase

ASP.NET Core

.NET

API Integration

Full-Stack Mobile

React Native

Flutter

Supabase

Android

Cross-Platform Apps

Offline Support

Notifications

Synchronization

Data Integration

Database & Data

SQL

SQL Server

Data Analysis

Excel

Power BI

Microsoft Access

Python Development

Python

OOP

Tkinter

GUI Development

Input Validation

Business Logic

Data Handling

How I approach work: understand the problem first, break it into smaller parts, build and test each layer, then refine the solution around usability, reliability, and the actual goal.

PROJECTS

Work that shows how I build

Real, personal, and academic projects selected to show practical development experience.

VG

VALUEGAIN
FINANCIAL ADVISORY

VG / ValueGain Corporate Website & Web System

A full-stack web system developed for real company use. I worked across the front-end, backend, and database layers to build an integrated and responsive solution rather than a front-end-only project.

MY ROLE

Full-stack development across interface, application logic, and data storage.

React

TypeScript

ASP.NET Core

.NET

SQL Server

Responsive UI

Amr GO - Cross-Platform Task Management Application

A personal task-management application for Windows and Android, designed around real daily use. The project focuses on keeping the core task experience consistent across both platforms.

KEY CAPABILITIES

Task management, scheduled reminders, recurring tasks, snooze, offline support, and cross-device synchronization.

Windows

Android

Reminders

Offline

Sync

Cross-Platform

SM

PYTHON SYSTEM

Supermarket Management System

An academic Python project built to manage supermarket data and business logic in a structured way. I used Object-Oriented Programming to organize the system into reusable components and applied input validation and data handling to support reliable operations.

FOCUS

Python application structure, OOP, inventory and business logic, data handling, and input validation.

Python

OOP

Data Handling

Input Validation

Inventory Logic

AmTech - E-Commerce & PC Builder

A live ASP.NET Core web application with product browsing, custom PC building, cart, checkout, accounts, orders, and admin workflows.

FOCUS

Production .NET web development, commerce logic, SQL Server integration, and deployment.

ASP.NET Core

.NET

SQL Server

E-Commerce

LIVE DEMO

BACKGROUND

Learning with a practical direction

Business Informatics, digital transformation, software development, and professional training.

EDUCATION

Helwan National University

Bachelor's Degree in Business Informatics and Digital Transformation

Current Level: Level 3

Expected Graduation: 2028

Relevant Coursework

Introduction to Programming, Object-Oriented Programming, Database Basics, Web Development Basics, Information Systems, Business Administration, Digital Transformation, and Microsoft Office.

Featured Training & Certificates

Digital Egypt Pioneers Initiative (DEPI)

Front-End Web Development Track - In Progress (2026)

The Arab Contractors

Digital Transformation & Smart Systems Training - 40 Hours (Jul 2026)

Autodesk Authorized Training Center

Digital Twin - Revit 2026 (Jul 2026)

PMI / Injaz Egypt

Project Management Training Session

Google for Developers & ITI

Build with AI Masr Edition (2026)

ITI Mahara-Tech

Python Programming Basics (2026)

Google Maharat / Injaz Egypt

Boost Your Productivity with AI

Injaz Egypt / Ministry of Youth and Sports

Innovation Camp Program (Apr 2026)

LET'S CONNECT

Let's build something useful.

I am open to Full-Stack Web and Mobile Development internships, junior opportunities, data-related roles, and suitable freelance projects where I can contribute, learn, and build practical solutions.
